**LOW LIGHT, NIGHT AND INCLEMENT  
WEATHER PHOTOGRAPHY FOR  
CRIME SCENE AND TRAFFIC  
HOMICIDE INVESTIGATORS**

By  
Robert Wyman  
Certified by IAI  
In Association with Forensic Pieces, Inc.

**ABOUT YOUR INSTRUCTOR:**

Robert Wyman formerly served as a traffic analyst, traffic engineer, and emergency management coordinator for the Miami-Dade County government. This prepared him for his next role in a civilian position as special events coordinator for the City of Miami Police Department and allowed him to start a full-time private practice in 1988. Later, Wyman continued education in the fields of traffic crash reconstruction, forensic science, and digital photography. Robert is now the President of Wyman Enterprises, Inc., which provides forensic photography and evidence documentation services for both civil and criminal cases. Mr. Wyman has also been accepted as an expert witness in federal, state, and local courts. Much of his work in traffic crash reconstruction and evidence documentation has been published in multiple books, articles, magazines, and industry newsletters. He also is a frequent guest speaker at conventions, seminars, and local association meetings for private investigators, paralegals, attorneys, traffic crash reconstructionist and crime scene investigators. Wyman's latest advancements are in the emerging integration of Smartphone "Apps" with the forensic and investigative workflow.

ROBERT WYMAN

## LOW LIGHT, NIGHT AND INCLEMENT WEATHER PHOTOGRAPHY

### COURSE DESCRIPTION

This exciting training opportunity is a 5 – hour presentation at night focusing on several techniques for low light, night and inclement weather photography. It will cover basic camera settings and functions, ambient light photography and different types of inclement weather photography, as well as use of smart phones to enhance photography in these types of conditions. These and many other important techniques taught in this course are meant to be used by traffic investigators and crime scene investigators that are required to take quality photographs in tough lighting situations. The first half of class is to be conducted at the hosting agency in a classroom setting while the second will be held at a nearby location for several thought-provoking and engaging field exercises that practice different lighting and photography techniques in difficult photo-taking scenarios.

### COURSE TOPICS:

- Automatic and manual camera settings
- Utilization of built-in camera flash units
- Use of external flash units
- Recording images in difficult lighting conditions
- Ambient light photography
- “Painting with light” photography
- Dawn, dusk and low-light photography
- Moon phase influence on photography (light from the full to new moon)
- Inclement weather photography; rainstorms, fog, wind and dust
- Utilization of Smartphone “apps” to supplement photography tasks
- Lasers
- Infrared (IR imaging)

### WHAT TO BRING TO CLASS:

- Casual attire is suitable
- Digital camera equipped with Tripod
- Remote shutter release (wired or wireless) (optional)
- A laptop Computer for note-taking is recommended
- Polarizing filter (specific size for each attendees camera lens)
- Flashlight for “painting with light” exercise
- Penlight to see camera

### WHO SHOULD ATTEND?

Crime scene investigators, traffic homicide investigators or anyone needs to take high quality crime scene photographs in low light or inclement weather situations.
