### ADVANCED BLOODSTAIN PATTERN ANALYSIS
By
Jan Johnson, CSCSA
Retired Senior Crime Laboratory Analyst
Certified by State of Florida in Crime Scene
Analysis and Bloodstain Pattern Analysis
Certified by IAI
in Crime Scene Analysis
President of Forensic Pieces, Inc.

## ABOUT YOUR INSTRUCTOR:

Jan Johnson is retired from the State of Florida with over forty years of experience in law enforcement. After ten years with the F.B.I., Jan made the transition to crime scene analysis. She is recognized by the IAI as a Certified Senior Crime Scene Analyst and worked for FDLE in Pensacola, Florida for over twenty-two years. As a laboratory analyst and a crime scene examiner, her field of experience includes detection, collection, and preservation of physical evidence, bloodstain pattern interpretation, trajectory analysis, buried body and skeletal remains recovery, clandestine laboratories, and numerous other procedures involving crime scene investigations. Due to her expertise in bloodstain pattern interpretation and crime scene reconstruction and analysis, Jan has testified in hundreds of criminal cases as an expert witness. Before retiring in 2004, Jan spent three years with the Escambia County Sheriff's Office as supervisor of the Crime Scene Latent Print units, as well as overseer of ECSO's new crime lab, which she designed. Jan served in highly distinguished role of President of the IAI in 2004, Chairman of the Board in 2005, and considers herself honored to have been on the IAI's original Crime Scene Certification Board. Jan has served as the President for the Florida Division of the IAI in 2007 as well as Chairman of the Board in 2008. She continues to serve on various committees within both the IAI and FDIAI. Jan has taught numerous courses in the areas of both Crime Scene and Bloodstain Pattern Interpretation and Crime Scene Reconstruction in the United States and abroad, Including South Africa, Brazil, and Bermuda.

JAN JOHNSON, CSCSA

**COURSE DATES:** JULY 20 – 24, 2020
8:00 AM- 5:00 PM

**LOCATION:** GUS GEORGE LAW ENFORCEMENT ACADEMY
1521 EUGENE HEIMANN CIRCLE
RICHMOND, TX 77469

## COURSE DESCRIPTION:

This course was developed for the crime scene technician/analyst, detectives and forensic investigators who have already completed a basic bloodstain pattern analysis workshop and are seeking to learn more advanced skills in documenting, processing, and evaluating those scenes in which bloodshed has occurred.  This course will enhance the basic skills and advance the students up to a competency level which is required for independent analysis.  Contents of the course will include clothing examination, advanced techniques for blood detection, use of the scientific method and the ability to apply experimental designs to help support your bloodstain pattern interpretations.  This course will include critical evaluation of prior cases already prepared as well as analysis of complex mock bloodstain crime scenes.  Students will be expected to recognize and identify bloodstain evidence and to properly document and preserve that evidence.  At the conclusion of this course students will be able to perform proper interpretation of bloodstain evidence and patterns, as well as prepare a report and render expert opinions.  These new skills will be put to the test with a moot court setting at the end of the course in which the students will defend their expert opinions, utilizing their new knowledge, skills and abilities as a bloodstain expert.  Students are encouraged to bring a bloodstain case for presentation and peer review.  Bring your critical thinking hats for an exciting week-long challenge!

## COURSE TOPICS:

- Understanding of Bloodstain Terminology Past, Present, and Future

- Recognize and Properly Document Bloodstain Patterns

- Utilization of Fundamental Knowledge of the Principles of Math and/or Physics which May Support or Contradict the Reconstruction of the Scene

- Knowledge of the Scientific Method and Application to Experimental Design to Support Opinions

- Interpretations of Bloodstains for Scene and Event Reconstruction

- Preparation of Bloodstain Reports and Expert Opinions

- Courtroom Preparation for the Bloodstain Expert Witness

- Moot Court Session with Peer Review

## WHAT TO BRING TO CLASS:

Laptop computer and PowerPoint Presentation software, a digital camera and tripod.  Casual attire is suitable for the course of the week, but please prepare to be suitable for a courtroom setting on the day when each attendee will participate as an expert witness in a moot court.

## WHO SHOULD ATTEND:

This comprehensive, 40-hour course is designed for the student who has previously attended an introductory bloodstain pattern identification workshop. This includes the proper documentation of bloodstains and the identification of the physical characteristics of the bloodstain patterns created in violent crime scenes where bloodshed occurs. While prior bloodstain pattern analysis training would be greatly beneficial as a prerequisite to this course, it is not imperative and students may attend this informative and exciting training opportunity.

*Crime scene supplies provided by Forensic Pieces during class may be purchased at Arrowhead Forensics.*
