Forensic Pieces presents:
**BASIC CRIME SCENE
INVESTIGATIONS**

In Honor of Our Beloved Founder of Forensic Pieces, Jan Johnson, CSCSA

We commit to you the same techniques, structure, and integrity that our fearless leader Jan Johnson carried with her to every scene, every training, every conference, every time. It will be our constant goal to strive, meet, and exceed the extremely high standards set by the one who led thousands all over the world to success in the areas of Crime Scene Investigation, Bloodstain Pattern Analysis, Shooting Reconstruction, Crime Scene Reconstruction, and so much more. Each instructor and training will reflect the legacy Jan wanted for her company and the forensic community. We appreciate all the continued support as we forge ahead our new path forward. As Jan Johnson would always say: Full Speed Ahead!

ABOUT YOUR INSTRUCTOR:

Daniel Steelman serves as the Captain of the Baldwin County Sheriff's Office Investigations Command. Daniel is currently an IAI certified Senior Crime Scene Analyst, holds a Bachelor's Degree from the University of Southern Mississippi and a Master of Science from the University of Oklahoma. Daniel also serves as an HSI Task Force Agent, working federal crimes in the Southern District of Alabama. Daniel serves as a member of the Baldwin County Major Crimes Unit, Team Leader of the Baldwin County Sheriff's Office Crisis Negotiations Team and as an instructor in Crime Scene and Evidence related topics. Daniel formerly served as a Field Training Officer and as a U.S. Secret Service and FBI Task Force Agent, working on the FBI Innocent Images Initiative. Daniel has testified in hundreds of cases in municipal, state and federal court and has been qualified as an expert witness in bloodstain pattern analysis and shooting incident reconstruction.

COURSE DESCRIPTION:

The number one reason why most crime scene investigations are unsuccessful is because there was inadequate crime scene processing and analysis. Working a crime scene, whether major or minor, is a process that involves a wide range of skills. This 5-day course was developed as a refresher workshop for crime scene investigators, or for the new officer with limited exposure and experience in crime scene processing. The detection, collection, documentation, and preservation of physical evidence are key elements involved in every crime scene. This course will demonstrate and elaborate on techniques that may or may not have been acquired in the field and will assist in developing new techniques in crime scene examinations. Forensic science is forever changing and improving, and new techniques and equipment are constantly being developed to assist the law enforcement officer with the challenges of the “every scene, every time” concept.

COURSE TOPICS:

- Equipment and safety
- Crime scene management
- Documentation: photography, note taking, searching, sketching and measurements
- Physical evidence packaging
- Evidence detection,
- Documentation, collection preservation of evidence to include firearms, biological evidence, microscopic trace, latent print, footwear and tire track impression, tool mark and bite mark impression
- Bloodstain pattern: Terms and documentation
- Bluestar forensics blood detection
- Report writing
- Courtroom presentations

WHAT TO BRING TO CLASS:

Very casual attire and a Digital camera with macro capabilities is preferred. A laptop computer for your tasks is also recommended.

WHO SHOULD ATTEND?

This is a hands-on course that is specifically designed for crime scene officers with or without experience. This course is taught in a manner in which the crime scene officer can easily understand.
