In Honor of Our Beloved Founder of Forensic Pieces Inc., Jan Johnson, CSCSA

We commit to you the same techniques, structure, and integrity that our fearless leader Jan Johnson carried with her to every scene, every training, every conference, every time.

It will be our constant goal to strive, meet, and exceed the extremely high standards set by the one who led thousands all over the world to success in the areas of Crime Scene Investigation, Bloodstain Pattern Analysis, Shooting Reconstruction, Crime Scene Reconstruction, and so much more.

Each instructor and training will reflect the legacy Jan wanted for her company and the forensic community. We appreciate all the continued support as we forge our new path forward. As Jan Johnson would always say:

Full Speed Ahead!

WHO SHOULD ATTEND?

This is a hands-on course that is specifically designed for patrol officers, investigators, detectives, and crime scene personnel or without experience.

WHAT TO BRING?

Casual attire is suitable. It is highly recommended that students bring a laptop computer as well as a digital camera however it is not required to attend this training.

MEET YOUR INSTRUCTOR

Daniel Steelman*, CSCSA

***There is a slight chance instructor may change**

Daniel Steelman is the Chief of Police at Robertsdale Police Department. Previously, he was a Captain at Baldwin County Sheriff's Office, leading the Investigations Command. A law enforcement officer since 2000, he's also become a Certified Senior Crime Scene Analyst and holds degrees from the University of Southern Mississippi and the University of Oklahoma. He's a graduate of the FBI National Academy and has served on various federal task forces. Daniel is an expert in bloodstain pattern analysis and shooting incident reconstruction, having testified in numerous courts.

For his full professional background visit our Instructors Page at www.forensicpieces.com.

COURSE DESCRIPTION

The number one reason why most crime scene investigations are unsuccessful is because there were inadequate crime scene processing and analysis. Working a crime scene, whether major or minor, is a process that involves a wide range of skills. This 5-day course was developed as a refresher workshop for crime scene investigators, or for the new officer with limited exposure and experience in crime scene processing. The detection, collection, documentation, and preservation of physical evidence are key elements involved in every crime scene. This course will demonstrate and elaborate on techniques that may or may not have been acquired in the field and will assist in developing new techniques in crime scene examinations. Forensic science is forever changing and improving, and new techniques and equipment are constantly being developed to assist the law enforcement officer with the challenges of the "every scene, every time" concept.

These 40 training hours may be applied to the International Association for Identification Crime Scene Certification application.

Don't miss out on this exciting training!

COURSE TOPICS

Equipment and Safety, Crime Scene Management, Documentation: Photography, Note Taking, Searching, Sketching and Measurements, Physical Evidence Packaging, Evidence Detection, Documentation, Collection Preservation of Evidence to Include Firearms, Biological Evidence, Microscopic Trace, Latent Prints, Footwear and Tire Track Impression Evidence, Tool mark and Bite mark Impression, Bloodstain Patterns: Terms and documentation, Bluestar Forensics Blood Detection, Report Writing, Courtroom Presentations
